

CMLabs recognized for innovation in the military training industry

October 23, 2007 – Montreal, Canada – CMLabs Simulations Inc., the premier provider of physics-based behavior modeling for real-time simulation, has been selected as a Top 100 company by *Military Training Technology*, for having made “a significant impact in the military training industry” for 2007.

CMLabs was chosen from over 600 entries for *Military Training Technology*’s “Up and Coming” Award, which recognizes accelerated growth. Since its founding in 2001, CMLabs’ COTS product, Vortex, has been implemented in more than 100 industrial, academic and military applications.

“CMLabs is pleased to be recognized by Kerrigan Media’s panel and we are committed to building on our successes in the military training industry. This award reflects the significant impact CMLabs’ innovation has made, and continues to make, to the benefit of our clients.” said Arnold Free, CMLabs’ VP of Business Development.

About CMLabs

CMLabs provides specialized physics-based behavior modeling for real-time simulation. CMLabs’ combination of professional services and innovative software tools enable developers to create high-fidelity interactive applications. CMLabs’ commercial-off-the-shelf (COTS) product, Vortex, is the leading development platform for modeling physics-based vehicles, machines and robots. Vortex is used by application developers to build physically accurate motion models and interactive behaviors for demanding industrial applications such as training, virtual reality, and robotics and general visualization. For more information, please visit CMLabs on the web at www.cm-labs.com or contact Chris Funk at chris.funk@cm-labs.com.
