

## KCEI CORPORATION TO DISTRIBUTE VORTEX IN KOREA

*CMLabs' and KCEI team up to bring vehicle and machine modeling software to Korean market.*

November 1, 2004 - Montreal, Quebec – CMLabs, developers of Vortex, the most widely used physics engine for the visualization and simulation community, is pleased to announce a newly signed distributor agreement with KCEI Corporation. Based in Seoul, Korea, KCEI will manage all sales and marketing activities for Vortex in the region.

The agreement with KCEI will serve to increase awareness of Vortex throughout Korea and make the product more readily available to simulation engineers. KCEI recognizes the value that Vortex brings to complex vehicle and machinery simulations and will work with CMLabs to further cement Vortex as the primary COTS solution for training and visualization applications. “KCEI’s proven success at bringing other products to the Korean market is bound to provide CMLabs with the exposure and support required to expand our presence in this market,” Robert Weldon, CEO CMLabs.

### ABOUT CMLABS:

CMLabs is the leading service provider specializing in physics-based behavior modeling for 3D simulations. The core development tool, Vortex, is a comprehensive COTS simulation engine used to model accurate motion and interactive behaviors for real-time applications involving heavy vehicles, industrial equipment, robotics and more.

### ABOUT KCEI

Established in 1982, KCEI conducts research and development on the area of M&S including visual simulation fields. KCEI has been working as an exclusive distributor with many companies belonging to the Solution Group for over 10years. The solution Group including MPI has the greatest market share in Korea. KCEI participated in the

public projects by the Ministry of Commerce, Trade and Energy and Military purpose simulator development in the early 1990. Our engineering team has over 10years of experience with outstanding skills and expertise in today's demanding market of visual simulation. KCEI is endeavoring to master the most quality service and marketing of products.
