

Empty Container Handler Simulator Training Pack

Simulated Equipment Specs

Stacking height: Up to 8 containers

Load capacity: 9,000 Kg (10 Tons)

Wheelbase: 4.5 m (14.5 ft)

Max speed: 27 km/h (17 mph)

Overview

Designed to run on any CM Labs port equipment simulator, the Intellia Empty Container Handler Simulator Training Pack allows trainees to rapidly acquire operational skills in a pressure-free, safe learning environment. The training pack features all the components of a real empty container handler, and accurately reproduces equipment behavior under various weather conditions, loads, and even equipment failures. With a focus that goes far beyond basic controls familiarization, the Empty Container Handler Simulator Training Pack exposes operators to conditions that would be challenging or unsafe to replicate with real equipment.

Key Features & Benefits

A step-by-step training program that prepares operators for real equipment by covering beginner to advanced driving tasks & yard work around ITVs and external trucks.

Unlimited exercises can be made with the exercise builder, allowing ports to offer the specific training that meets their needs.

Best-in-class lifting simulation ensures trainees understand how the equipment really works & what is required for efficient operations.

A Complete Training Solution

The Empty Container Handler Simulator Training Pack incorporates CM Labs' renowned core technology, which offers the most realistic simulations on the market. This results in a training solution that delivers the most transferable operator skills anywhere, outside of real equipment. It is the only solution on the market that can tip when the simulated equipment brakes or corners too fast, and that reacts realistically when loads are distributed unevenly.

Trainers can also elevate their lessons with Intellia's suite of instructor support tools, which include next-generation reporting, real-time trainee monitoring, and customizable learning path planning features. Additional capabilities include the ability to introduce machine malfunctions during training and assess progress using performance indicators that track aptitude in three key areas: safety, productivity, and quality.

Dedicated to Your Training Success

CM Labs' simulators are built to last and designed for years of 24/7 operator training. The training packs are compatible with various hardware configurations, designed to fit your budget, space, and specific training needs. Choose from:

- Portable **Trainer** desktop series
- Fully immersive **Advantage** series
- Premium **Master** and **MasterCab** series

Learning Outcomes

- ✓ Becoming familiar with bays, rows, and cell identification
- ✓ Manipulating 20-ft, 40-ft, and 45-ft containers
- ✓ Driving and lifting in confined spaces
- ✓ Loading & unloading containers stacked 8 high
- ✓ Unloading containers on uneven stacks
- ✓ Driving safely over uneven ground

*The learning program can also be supplemented with CM Labs' optional Double Empty Container Handler Add-On Module.***

Performance Metrics

The training pack tracks over 20 different metrics, including:

- ✓ Number of containers moved
- ✓ Number of collisions
- ✓ Operator errors
- ✓ And more

Compatible Industry-Grade Controls

- ✓ Foot pedals
- ✓ Steering wheel
- ✓ Professional joysticks and control box

***Add-on modules are subject to change. Please consult our website or connect with your sales rep for more details.*
