

# Intellia Instructor Training Management

Scalable next-generation centralized planning and management with live monitoring to guide, assess, and engage operator trainees

Intellia Instructor is designed to help training organizations scale their training and learning path planning while streamlining administrative functions. Uncoupled and untethered from a teaching station, instructors can support multiple trainees at once while keeping a close eye on how individual trainees are performing, in real time.

Used in parallel with CM Labs' best-in-class training packs, the data extracted from training results accurately reflect a meaningful evaluation of an operator's skills. Based on patented engineering-grade authentic machine behavior, operator assessments offer valuable insights into fuel consumption, cycle times, and safe operation levels in simulated real-world scenarios.

## Benefits

### Scale Your Training

**One-to-many:** Instruct multiple trainees, via training station or tablet, creating a dynamic learning environment

**Unlimited simulator connections:** There is no limit to the number of simulators that can be connected and viewed simultaneously

**Location management:** Limited only by your simulator network, seamlessly coordinate multiple training rooms

**Multiple super users, multiple screens:** Use Intellia Instructor concurrently for efficient collaboration

**Modular training packs:** Add any solution, at any time, from CM Labs' suite of training tools

### Leverage Meaningful Assessment & Insights

**Objective reporting:** Pull concise and insightful views on trainee progress that truly matter

**Real insights:** Use real data for analysis because your training is based on authentic simulated machines

**Easy viewing:** See unique trainee data in dashboards & reports

**Designed for instructors:** Designed in collaboration with industry experts, Intellia Instructor allows your trainers to work more effectively

### Enhance Trainee Focus & Autonomy

**Portable training:** Untethered from a training desk, monitor trainees more closely using a tablet

**Create unscripted & unparalleled training experiences:** Trigger live weather conditions and faults to push training further and test critical thinking skills

**Set a learning path:** Track training progress by establishing a standardized specific guided sequence and score threshold for exercises for the class

**Self-paced learning:** After establishing sequence and scoring thresholds, trainees can continue on to the next exercise, in the right order, at their own pace

**Session reports:** Students get immediate feedback after completing each exercise, gaining valuable timely insights to enhance their learning experience

### Streamlined Admin Functions

**Bulk data entry:** Make small work of big tasks with the bulk import of trainee data

**Learning management:** Easily identify trainees and track their training history for evaluation

### Tools to Boost Training

**360-degree monitoring:** Get a unique viewpoint on training beyond the classroom alone with Intellia Drone View. Enter the trainee's exercise to monitor, in real time, from three viewpoints—flying by drone, walking through the jobsite through an avatar, or below ground in Subterranean mode.
