

CM Labs Trainer

The portable all-in-one training simulator

Introducing the CM Labs Trainer

Designed for maximum portability and simple set up, the CM Labs Trainer simulator makes it easy and affordable for organizations to run CM Labs' catalogue of quayside and yardside port equipment training packs anytime, anywhere. It is the ideal training solution for the classroom or on the go at job fairs and career development events.

Benefits

Safe, Effective Training, 24/7

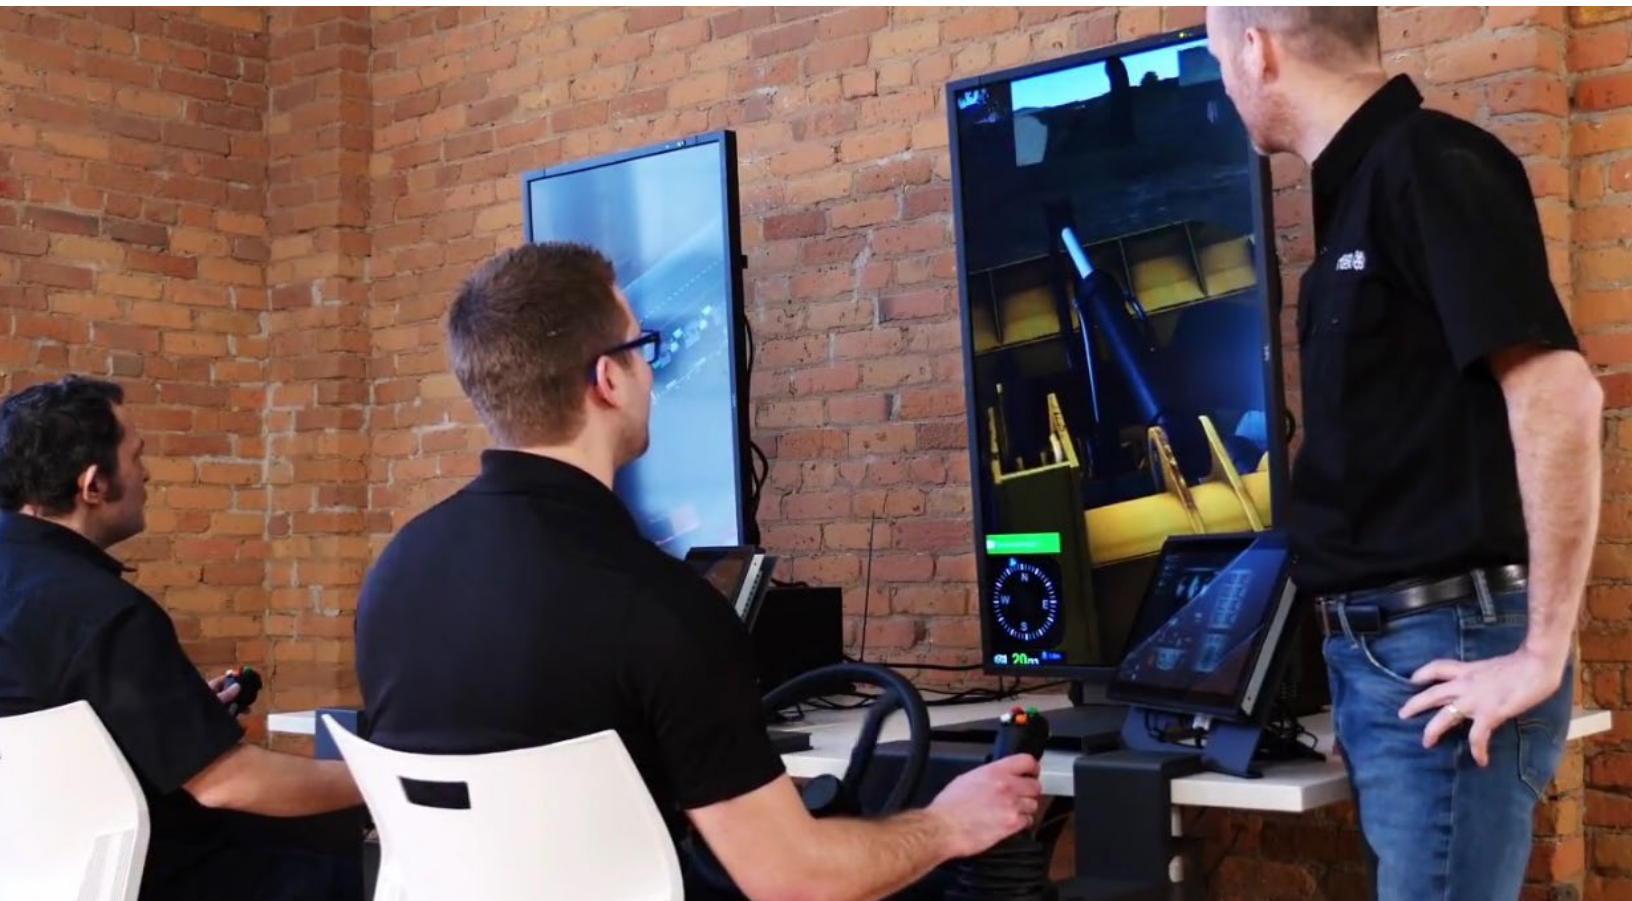

Training for port terminal operations is often complicated by lack of equipment availability. With the CM Labs Trainer, you have a dedicated training resource that's available day or night and in all weather.

All-In-One Training Platform

The CM Labs Trainer features training that covers many equipment types, from quayside to yardside, with a single simulator.

Built to Last

With professional-grade displays, controls, and computers, the CM Labs Trainer is built to last. It is designed to service port terminals with years of learning.

Meet the CM Labs Trainer

1. IMMERSIVE DISPLAYS

With leading port terminal visuals in a compact format, the view from the simulator cab replicates the view from the seat of the actual equipment.

2. A PORTABLE SOLUTION

Take your training where you need it most with a solution that's easy to transport and easy to set up.

3. OPERATOR TOUCHSCREEN

The touchscreen makes it easy for trainees to log in and switch between training exercises. The touchscreen also acts as the equipment computer interface, including auxiliary controls and operator dashboard.

4. RUN A FULL EQUIPMENT FLEET

The CM Labs Trainer can run most quayside and yardside training packs.

5. PROFESSIONAL-GRADE CONTROLS

With the CM Labs Trainer's equipment-specific hot-swappable control sets and pedals, there's no need to shut down the simulator to change controls when switching between training packs.
